The Legend Of Tinker Bell

There once was a Fairy who was banished from her realm for reasons unknown. She was sent to live among mortals and rumor has it, she still roams today. So, the legend continues that she was banished from her realm for being cruel to other living creatures, especially gutting her children slaves. Some say she is here now searching for a way to get back to her realm and that she continues her killing ways with whomever she comes across. You see, she is not like your typical killer, for she can appear out of nowhere.

You can't see her coming.
You don't know when she'll show up.
She finds unspeakable ways to butcher you.
You think you're safe and then. . .
POOF!! She's there.

Payton had good parents, good friends, and a love for fairies, but her sister Skylar was a different story.

Constantly mean to her, Payton finds herself as a servant at Skylar's costume party. Sad, Payton wishes she had a fairy to help and her wish comes true when Ellie magically appears with a promise to help her.

Payton finds out that Ellie has an ulterior motive.

THE STORY

Skylar and Payton are about to enjoy a weekend without their parents. Even though Anthony warns "No Parties", Skylar has other plans that include intimidating her younger sister.
